

EXTERNAL WINDOW GRAPHICS

i Your window graphics have been printed using the **finest grade vinyl**, solvent inks and are weather proofed with a pressure sensitive laminate. Your graphic has a **UV protective layer** within the substrate but the image may fade over time particularly if it is subjected to strong sunlight for long periods.

! **Please note the following...**

1 **On installation** bubbles may occur, this is completely natural and will over time smooth out as the materials adjust to the mounting position.

2 **Do not** use any window cleaning or surface cleaning products or abrasive cloths or sponges. Your graphics should only be cleaned using a damp cloth.

For stubborn stains use a small amount of washing up liquid on a damp cloth and gently clean the surface. Buff any smears or dry the area using a microfibre cloth.
