

## CAFÉ BARRIERS

PrintSolutions

**i** Assembly instructions

There are many components in each pack to assemble your barrier system. The time it takes you to complete assembly will depend on how many components there are and what size system you are erecting.

- 1** Carefully remove the café barrier components from the packaging and place all components on a clean and smooth surface to prevent scratching.
- 2** Use both spanners to assemble the base. Screw the post onto the base by hand until the post is tight to the base.
- 3** Slide the banner onto the top and bottom poles ensuring that the text is the right way up. Clip the top pole to each post then attach the bottom pole using the spring clips.
- 4** There are economy and premium systems in all types of material however, all of them are put together in the same way.
- 5** Ensure that the café barriers are not positioned on uneven or loose surfaces, ensure the bases are level.
- 6** Do not sit, lean or stand on the café barriers once assembled as this could result in injury/damage.
- 7** Use a soft damp cloth and a mild detergent to clean the café barriers once erected. **Do not** use abrasive agents or solvents as they may harm the finish. During periods of inclement weather, the café barrier should be stored indoors. The fabric banner should be dried before storage.
