

POP UP BANNERS

PrintSolutions

Pop up banner instructions? Yes, we're not kidding. People often struggle to set up their banner, mainly because it's difficult to reach the top of the pole.

(Indoor systems)

Assembling

1. Take your pole and twist/snap it together easily into place
2. Slot the pole into the pole socket in the base and may need to turn to secure it
3. Now comes the moment for technique – rather than struggling to reach and stretching you simply need to walk backwards with the pole and as you do so – pull out the banner
4. Keep walking backwards with the pole in your hand until the top is at a comfortable height
5. Now you can easily clip/snap (depending on unit) the top on and there it is, your easily assembled pop up banner

Dismantling

1. Simply do it all again in reverse
2. Make sure you don't let go so it doesn't snap back too quickly into the cassette, as this could damage the graphic display panel and also the spring mechanism, which will need adjusting if this happens too often.
3. Once the banner is down, slot it carefully back into it's bag and try to store the cassette horizontally where possible.
